

The MAGNA KUSHION

The Magna Kushion is designed for machine operators working on CNC mills or lathes.

Anyone who has worked on a mill or lathe knows the stress created on your back when leaning into a machine, changing out parts, or just tooling. This simple, but effective Kushion changes all of that. The built in magnet allows you to position the Magna Kushion to the operators preference of comfort.

With the Kushion in place, the operator can now position their legs & knees in a way, so as to relieve the stress when leaning into the machine.

- For use on Mills, Lathes or any magnetic surface
- Easy set up, and fits just about anywhere
- Ideal for your Machinist safety and your machine shop
